

ECO-COUNCIL 'PLASTIC IS NOT FANTASTIC' CAMPAIGN FEBRUARY 2025

How can you get involved?

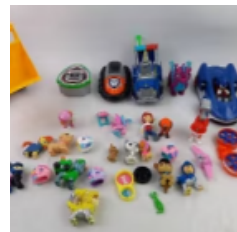

You can buy a bar of soap / shampoo or refills instead of new plastic bottles

Buy loose fruit and vegetables rather than bagged

Use recyclable bags for shopping

Buy second hand items, swap them or don't buy at all.

Use bamboo toothbrushes instead of plastic

Eco-council's Message

'We would love everyone to get involved in this campaign and help us make a difference to the amount of plastic that is getting into our oceans, littering our streets and that is harming nature.'

Eco -council is encouraging everyone at All Saints' C of E Primary School to have a single use, plastic free month for the whole of February. Why do this:

To reduce our carbon footprint

Because a lot of our waste plastic cannot be recycled so items are burnt or ends up in landfill

Plastic gets into the ocean and affects wildlife

Plastic ends up littering

Animals can get stuck in it

Did you know?

A plastic bottle never wastes away

12 million tonnes of plastic end up in the sea each year!

100,000 creatures get caught in plastic every month

It takes 20 years for a plastic bag to break down

If we don't take action, by 2050 750 million tonnes of plastic will be in the world's oceans!

Join us to do your bit to reduce single use, plastic waste in February 2025

Eco-council, 2025.
